

When the new 38,500 SF building opened at 405 South Main Street, Bentonville Public Library became a destination place in downtown Bentonville. Paying homage to its historical roots at the Massey, Bentonville Public Library's design features red brick, a grand veranda with signature columns, and a lovely fireplace area inside.

To meet the needs of a growing community, BPL is expanding its downtown location! Plans to add 22,750 SF to the facility, plus renovations in key areas, will integrate several amenities to expand core library services and provide new offerings. The Library will break ground in the spring of 2023; the grand opening is anticipated in summer 2024.
